UNCLASSIFIED

4. Method of Accomplishment

- a. The retrofit (ALT 914) will be performed on all B57-1 or B57-2 bombs scheduled for air transport.
- b. Retrofit procedures internal to the B57 shall only be performed by DOE personnel or by DoD personnel who have received first generation training.
- c. Tritium detection procedures will be required during the retrofit,
- d. No local fabrication or procurement of parts is required.

DO  
(b)(1)

5. Special Inspection Requirements

There will be no special inspection requirements.

6. Agency and Location

- a. The retrofit of B57-1's and B57-2's will be accomplished at the DoD facilities where the weapons are stored.
- b. DOE technical assistance will be available.
- c. Alteration removal will be provided by a change to the Retrofit Order.

7. Preliminary Estimated Time Scales

- a. The estimated completion date in accordance with TP 40-1 does not apply.

8. Other Program Developments

There are no other programmed developments affecting this change.
